Crestron Touchscreen
HK195 Wall Panel (MBEB)

This control panel is designed to power on and off the projector, switch between displays, and control volume and audio input source for multimedia presentations.

Useful Instructions:

1. This wall panel is usually located on the left or right most wall as you stand at the lectern facing the class. It is activated by tapping or touching the screen. It is not required to open any software.
2. The software control panel functions exactly as the wall panel control screen. It is on the lectern computer when the software is opened.
3. Volume can be adjusted with the slider bar on the bottom of the panel screen.
4. To turn everything off select Room Off

Common Issues:

- To turn on a projector, select the source (either the left monitor, right monitor, VGA, HDMI or video) and then select the projector you wish to display (left or right).
- Enable sound by selecting the source and then audio.
- The hearing assistance and lecture capture technologies require use of the wireless microphone located in the drawer.

Other Examples:

Visit [http://support.boisestate.edu](http://support.boisestate.edu) and select Classroom and Lab Technologies to schedule a General Purpose Classroom equipment demonstration.
